SCOPE

Aquaculture International is an international bi-monthly journal publishing original research papers, short communications, technical notes and review papers on all aspects of aquaculture. The Journal covers topics such as: * the biology, physiology, pathology and genetics of cultured fish, crustaceans, molluscs and plants: especially new species. * The water quality of supply systems, fluctuations in water quality within farms and the environmental impacts of aquacultural operations. * nutrition, feeding and stocking practices, especially as they affect the health, behaviour, appetite, conversion efficiency and growth rates of cultured species. * The development of economically sound and sustainable production techniques. * Bioengineering studies focusing on important aspects of the design and management of both offshore and land-based systems, as well as the integration and application of improved scientific and engineering technologies. * The ure. Each article will, where appropriate, include a ducted or literature synthesized, in a way that can
